Dear Permittee:

Enclosed is a twelve month supply of preprinted Discharge Monitoring Reports (DMRs), beginning with the January 1995 reporting period and going through December 1995. This set of preprinted DMRs reflect the effluent limitations of your NPDES permit.

Each page of the DMR needs to be signed and dated. If all DMRs prepared for a particular month are not used, please mark the "no discharge" box in the upper right-hand corner of the DMR, sign, and submit it with the other completed DMR forms.

Our computer flags missing data as noncompliance, and your facility then appears on a violators list. To prevent this from happening, please fill in each blank space on the form. Any value not filled in should be explained in an attached letter. The number of excursions, frequency of analysis, and sample type also needs to be filled in. Completed DMRs should be mailed to the following address:

U.S. EPA, Region 10  
1200 - 6th Avenue  
Seattle, WA. 98101  
Attention: WD-135

If you have any questions on how the permit was translated to the preprinted DMRs, please feel free to call Lucita Valiere in Seattle at 206-553-1217. Any other calls concerning your facility should be directed to me at 334-9489 in Boise.

Sincerely,

A handwritten signature in cursive script that reads "Nickie Arnold".
